NEW YORK STOCK MARKET BACK TO ITS PREVIOUS LOW LEVEL.

Bank Loans Falling Off and Millions of Cash Lying Idle-Local Markets Drowned Out.

At New York, Saturday, money on call was easy at 1%@1% per cent.

Prime mercantile paper, 31/2/04 per cent. Sterling exchange was steady, with actual business in bankers' bills at \$4.87@4.87% for demand and \$4.85%@4.86 for sixty days; posted rates, \$4.861/2 and \$4.88@4.881/2; commercial bills, \$4.85.

Bar silver, 61%c; Mexican dollars, 48%c; silver certificates, 61%@62%c. At London bar silver closed at 28 7-16d per ounce. Exports of specie from the port of New

York for the week amounted to \$2,000 in gold and \$976,731 in silver. The imports for the week were: Gold, \$18,661; silver, \$35,353; dry goods, \$3,875,184; general merchandise, \$8,899,339.

The New York weekly bank statement shows the following changes: Reserve, decrease\$1,496,525 Specie, decrease Legal tenders, decrease............ 2.204.100 Deposits, decrease 3,309,900

Circulation, decrease 112,600 The banks now hold \$46,170,050 in excess of the requirement of the 25 per cent. rule. The New York Financier says: "Despite the fact that the banks gained largely from the interior during the week, the statement of the associated banks for the week ending April 10 shows an actual decrease of \$2,324,000 in cash. But it is altogether likely that the statement, owing to the system is a reflection of the previous week's transactions. There is certainly nothing to bear out the changes reported for the six days ending April 10; thus within two weeks the New York banks have apparently lost \$4,177,300 cash, and while this represents approximately the payments into the treasury or customs duties no account seems to have been made of the cash which has come into the banks during that time, the deposits of the banks during the last month amounting to over \$12,275,000. In the same time loans have decreased about \$3,500,000, while the excess reserve fell off over \$6,500,000. The actual cash holdings of the banks are almost \$10,000,000 less than they were one month ago, so that, while the successive changes from week to week appear small, the operations for the month in the aggregate have considerably reduced the free cash in banks. The payments by importers into the treasury are responsible for the greater part of the loss in cash holdings, and the fact that the treasury

For the moment the course of the loan market is disappointing, the operations of the past week having resulted in a decrease of \$220,100. This, however, coming after the heavy liquidation of the past several weeks, is small, and leads to the hope that the turning point may have been Total sales of stocks were 74,241 shares, including: American Sugar, 9,500; Burlington, 5,600; Chicago Gas, 19,600; Reading, 4,800; St. Paul, 8,800; New Jersey Central,

has been gaining largely from the banks is

an additional evidence in this particular.

There was quite a marked undertone of firmness on the New York Stock Exchange Saturday, but the market felt the reflected depression of the London market on account of the outbreak of hostnittes on the Graeco-Turkish frontier. The opening was at a somewhat higher range than the cur-rent prices in London and there were sales for foreign account of the international shares. The prices of these were brought down to the London level soon after the opening. Both the grangers and the coal-ers were pressed for sale, and New Jersey Central and Delaware & Hudson lost a Central and Delaware & Hudson lost a point each. Chicago Gas was the leader of the market, though the total sales of stocks were only about 85,000. Of these over 19,000 shares were of Chicago Gas. The buying was good and the price rose to 831/8c, the best of the week, and, in fact, in many the best of the week, and, in fact, in many weeks. The rise in this stock stiffened the general market. Sugar rising to 114, and Delaware & Hudson and New Jersey Central recovering the decline. The railway list generally shared in the rally, but not sufficiently to overcome the early decline. The decrease of \$54,047 in the earnings for the first week in April of St. Paul was a factor in the early decline of the grangers. The closing was firm at the rally, but most of the stocks showed a slight net loss. of the stocks showed a slight net loss.

BACK TO THE LOW LEVEL. prevailed previous to the announcement of the Lake Shore refunding operation early in March, and the notable buying of railroad stocks which followed. Prices, except for Some of the Vanderbilt and the National State of the Vanderbilt and the e of the Vanderbilt properties and a few of the specialties which are affected by peculiar circumstances, are quite materially lower than then. But the situation presents the same narrow market and the same persistent industry of the bears in manipulating special stocks for their effect | securities is suggested by the fact that the on the general list. In the same way as railroads show no disposition to turn the then, also, the success of the bears in achieving success is immediately followed by a falling off in the volume of transactions and an undercurrent of resistance to As a rule, their relations remain harmonithe decline indicated by an unwillingness to part with holdings at the decline. The pear element is still a powerful factor in the market, as it has been ever since the Supreme Court's decision in the transmissouri case, but a large proportion of the short sales made at that time have been covered, and the fears of the unfavorable highly encouraging circumstance. The net effects on railroad values of the conditions laid down in that decision have largely subsided. Further confidence in the railroad situation has been engendered also by the manifest anxiety of the railroad authorities themselves to avoid any conflict of business interests and by the industrious effort making to provide means for preserving rates which will not conflict with the law. There is a disposition to rely on the authority of the Interstate-commerce Commission as an aid to the efforts of the railroad authorities in keeping the recalcitrant railroads in line. The mutual agreement of the roads to keep the commission informed of any deviation from schedule rates seems o be a salient feature of the new device of Western railroads as a substitute for the o'd associations. The members of the Joint Traffic Association seem to feel reassured rather than uneasy over the call from their attaches to it is shown by the fact that commission for a statement of existing contracts and agreements not reduced to writing, as a means to aid them in discovering any discriminations in rates, The efforts of the commission to aid in maintaining these rates, which are the creation of the traffic associations, constitute something of an anomaly, in view of the condemnation of the associations by the law as construed by the Supreme Court. The foundation for improvement in the market on recovery from the effects of the rate war scare thus seems to be well laid. of fifty millions. Its outflow would be only and the situation gains further promise from the strength shown by some of the individual stocks in the market and by the general average improvement in railroad earnings shown by reports for the last week in March. The tendency toward recovery was marked on Thursday of the week, when prices tended upward nearly all the day on the exchange and the demand broadened through the comparatively inactive But some of the general features of the business outlook are felt to be still unsatisfactory to a degree, and there are ten-

der spots in the list of stocks, through which harm is rendered to the whole marbusiness and prices on the Stock Exchange were directly affected by the fall in wheat on Wednesday, the lack of good price to the farmer for his product being regarded as a prime requisite for stability and growth in values. The apparent halt in the improvement of the iron and steel ustries was taken as a general factor lacking in encouragement.

COALERS WERE WEAK. It was felt that the outlook in other lines of business also was not entirely satisfacthe storms in the West and South was in trade circles is reasonably healthy, all taken serious account of. Quite the most notably weak spot in the market continues to be, as for some time past, the anthracite

oal properties. The action of the directors of New Jersey Central in fixing the dividend rate at 4 per cent. instead of 5 per cent, seemed to reassure holders for the moment, as there has been fears expressed of a lower rate or of passing the dividend. But the stock, after partial recoveries, again sagged to the lowest, fluctuating widely an through the week and closing at a net decline of 1%. The other coalers sympathized, but did not move over so wide a range, and closed with a net loss of a point or over, except Delaware & Hudson. This depression was telt sympathetically 11 and 13 West Pearl Street all through the market and was the constant resource of the bears in driving down prices. The effect of these drives was to discourage speculation in railroads, the market for which was dull all week and omparatively nrm, the general net decline GRUMBLE OF GAMBLERS in their prices being restricted to a fraction. But in a number of the specialties the trading has been large and the changes in prices often very marked. The protessional traders, however, played a large part in this class of dealings, and the changes were largely the result of manipulation. Chicago Gas was quite largely sold in anticipation of the municipal election in Chicago. That it was, in fact, oversold was made manifest by the large covering movement after the election. There was also steady buying for inside interests, the gain on the week being 4½ points, to 83%.

All the New York gas securities enjoyed a rise on account of the action of the Senate at Albany in passing the bill approved by the companies for a progressive reduction in the price of gas of 5 cents a year to \$1 per thousand reet. Brooklyn Union gained 8½ to 106½, with a reaction of 1½, and Consolidated Gas jumped 5% to 161% and lost the fraction. Sugar was as the one ending April 10. Two rainy days, a largely dealt in, a good proportion of the buying being to cover short accounts and of the selling for profits by traders. There was no news regarding the stock aside from the large imports of raw sugar coming into the country, which is expected to realize handsome profits on the increased price to result from the tariff. The tone of the money market has continued easy durting the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the distribution of the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the distribution of the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and the week and there has been a marked hog products, fruits, vegetables, Irish potatoes in the week and the week liminution in the volume of loans, though excepted, showed some advance. Sugar, coffee, it is to be taken into account that trust companies have done a good deal of business. The movement of funds for much of the large importation which has set in, especially of sugar, does not appear and it is believed that the importers were able to revision, but the demand is not as active as a finance these operations themselves. Rates

were well maintained, in spite of the dull-ness. Call funds ruled at 1½@1¾, the bulk of the transactions being at the minimum figure. Time money could be had at 2@4 per cent. for from thirty days to twelve months. There was a more general inquiry for commercial paper and liberal lines were taken by the trust companies and out-of- and corn are some lower than at the beginning

town institutions. Foreign exchange was easier in the early are not sufficient to supply the local demand from the starch works, hominy and cerealine open market discounts abroad and the reduction in the Bank of England's minimum rate of discount from 3 to 2½ per cent. The 4 red, 77@79c; wagon wheat, 78c. tone became firmer towards the end of the week, owing to scant offerings of commercial bills and the increased volume of im-

Transactions in bonds were largely con-tracted and the market displayed little fea-ture. Values generally moved in sympathy with the share speculation and operations were mainly in the speculative issues. Comparative prices are mainly below last week's final prices, but the recessions are trifling. The aggregate sales were \$5,337,000. Government bonds moved steadily up-

ward on light pure fours attaining the were \$63,000.	top le	vel.	The	sale:

Views of Henry Clews.

ing the situation in Wall street last week.

legal challenge against their freight asso-

ciations into an occasion for cutting rates.

in the Supreme Court in the case of the

Joint Traffic Association. The steady in-

crease of gold in the treasury is also a

stock held by the government is now \$152 .-

500,000, which is the largest sum held since

November, 1890. Nor has this accumulation

tan banks, which last week held \$86,000,000.

With such supplies we may look with com-

parative indifference upon the possibility of

shipments of the metal at a later stage

owed by the continuous firmness in the

rates of foreign exchange. So far we have

feit no effect from the demand for gold

from Austria and Japan. There is moder-

ate drain to both those countries, which

has been met chiefly by the Bank of Eng-

land; but what importance that institution

this week the bank has reduced its dis-

count rate to 21/2 per cent. The bank, no

doubt, reckons upon being able to get gold

from this country should this outside de-

mand develop into larger dimensions at a

later stage: but it is doubtful whether in

either Austria or Japan there will be any

balance of exports large enough to enable

those countries to command much foreign

meet any demand for the purposes of

either country with our annual production

'In its general aspect the condition of

trade exhibits some hopeful features. At

the moment there is a check to operations

arising from the uncertainty about the

pricess of wide ranges of goods growing out

of the impending changes of the tariff.

The extraordinary floods in the Mississippi

valley have also an interrupting effect, not

only from the direct loss of property and its attendant suffering, but also from the

suspension of transport facilities over a

large expanse of country. Also, some mis-

givings are felt as to the possibility of cot-

ton planting being delayed in certain flood-

ed sections. There is perhaps some reason for this feeling; but, while the delay would

be unfortunate, it would have the compen-

sation of an enrichment of the land from

the deposit attending the flood, and would

probably induce an increase of planting in

sections which have escaped the overflow

of the river. It is, therefore, premature to

draw any conclusions as to the effect of

the flood upon the cotton crop. Even, how-ever, should it have the effect of diminish-

ing the crop there would be a compensating advantage in the relatively higher price

upon a moderate scale, yet they are frequent, and the aggregate is not discouraging, either as to amount or profits. The

for the staple that would result.

a natural and healthy movement.

For our part we can well enough

From Chicago Revival Sermon. Christ did not tell his congregations that they would be saved in return for building fine churches or endowing colleges. A Christian who is a lazy man bears ing he is a Christian. There are no hearses in heaven; there is not a word in the Bible about celestial promise of eternal life. try to get grace enough at once to last him until he dies. throw the sermons of the pastor back into his face like a rubber ball returning from a brick wall. Many Christians have not enough grace

to make them hold their tempers. A lie is a lie whether it is a political lie a social lie, or a business lie, Moody's heyday will never be in the past He's a boy at sixty. The man who boasts that he is a paying member and not a praying member of church had better have an eye to his children; children of such men go to ruin. I hate half-heartedness of any kind; if man is going to come only half way into

the church he had better stay entirely in the world. Christians who get half over the border get it from both sides; the church clubs them on one side and the world throws bricks at them on the other. A great many Christians keep men out of the church by their gloom and solemnity; they hang their heads down perpetually like bulrushes. It does not pay to get sour as you get I pity a man who lives in the past. He lives on stale manna. He gets stunted. You never saw a shadow in the dark.

There must be light near by or there is no shadow. Get out of the shadow; move over Christ never preached a funeral sermon he broke up every funeral that he at-A lot of people would deride Rebecca die she live to-day. They would cry aloud to wait and see. They would advise her not to say much until she saw whether the well was going to hold out or not. Some Christians are like the well of man I know. The well is all right, with two exceptions-it freezes up in the winter and dries up in the summer. Peter and John didn't have a barrel of sermons to fall back on. They had some-thing else to do besides preaching on science, Cuba, Armenia, gold, silver or Some preachers get drier than Gideon's fleece. They need the dew of God upon

Many Christians never get beyond the third chapter of John; others live and die on the fourth chapter; a few get as far I am tired of people who say they want to live on crumbs. Crumbs are good enough for cats and dogs. The Christian wants nothing but the whole loaf. Don't you horrow trouble by thinking that there will be no good men on earth

after you are dead. With Colors Flying.

New York Mail and Express. There is every indication that General Horace Porter, embassador to France, will be given a series of "send-offs" in this city worthy of the man, the town and distinguished office to which he has been called. The local commandery of the Loyal Legion has arranged a dinner for the 22d. and the Republican Club has also declared its purpose to assault the embassador with viands and eloquence-the best the market affords of both. Nor is it to be doubted that the Union League, which has several times honored General Porter with election as its president, will fail to formally rec-ognize the tribute which his appointment indirectly pays to itself. If the general does not board his steamer with indigestion and "swelled head" it will be due to his prime physical condition and his splendid mental

MARKET FACED ABOUT ON REVIVAL OF FOREIGN WAR GOSSIP.

Bears Surprised by the Sudden Life Displayed by the Bulls-Other Markets Score Advances.

CHICAGO, April 10 .- Wheat to-day executed another of the somersaults which have characterized that market of late, the May option closing strong at a 11/3c advance. The warlike turn of affairs at the Greek frontier scared shorts and their covering made a very strong market all day. Corn, oats and provisions were similarly affected, corn advancing %c, oats 1/2c and provisions 71/6/15c. The bears in the wheat pit were disagree-

consols declined 8-16 for money and 9-16 for the account on the morning newspaper reports of the Greeks having crossed the Turkish frontier and encountered the troops of the latter power. A European war has on former occasions made so many fortunes for bull operations in wheat that the merest shadow of the possibility of such another chance makes them grab in a body for the lucky card. May wheat, which was only worth 64%c yesterday afternoon, started with buyers at from 66% to 66%c, and kept backing up and filling within 4c per bushel of the opening figures during the greater portion of the forenoon. Liverpool opened with a gain of 4d. Minneapolis and Duluth reported 284 cars, against 256 a week ago and 434 on the corresponding day of last year. Chicago receipts were seven cars. Bradstreet reported the week's shipments of wheat and flour at 2,037,000 bushels, against 2,464,000 bushels on the week before and 1.764,000 bushels a year ago. Reports about prospects for winter wheat and concerning spring wheat seeding were both bad, and to many it seemed that they were bad enough of themselves to warrant all the advance in the day's prices, and a good deal more. A report from St. Louis tien for certificate oil, 84%c, which was bid at the close; credit balances unchanged; shipments, was received to the affect that the State 69,381 bris; runs, 92,242 bris. the condition at 33. The government report to be issued this evening was expected to be about in line with the Cincinnati Price Current's estimate of 300,000,000 to 310,000,000 bushels as its total. The condition of 81 for the whole area would indicate a crop of about 305,000,000 bushels on an acreage of 24,000,000. The day's range in May wheat was from 65% c to 66% @66% c, and the closing price was 66c. July fluctuated between 651/2c and 661/3c and closed at 655/3c. The general impression with regard to the visible for the week is a decrease of about ,200,000 bushels. Corn ruled firm all day. The market was influenced chiefly by the stronger wheat and the war news, and there was an active covering by shorts, with little for sale. Exports were small, being 89,000 bushels. May opened %c higher, at 23%c, sold at 23%c, then advanced to 23%c, closing firm at 23%

Oats participated in the general better feeling, and unusually large business was credited to the day's market. The main feature was the buying of shorts, especially those who sold yesterday. Exports amounted to 69,000 bushels. May opened %c higher, at 16%@164c, advanced to 16%c and closed at 16% a16% c.

Provisions were very firm on the war scare and on light hog receipts. The market opened at a slight advance, and under good buying by packers prices advanced steadily. English packers sold pork to a limited extent. At the close May pork was 15c higher, at \$8.35; May lard 7½c higher, at \$4.20, and May ribs about 12½c higher, at

Estimated receipts for Monday-Wheat, 7 cars; corn, 130 cars; oats, 225 cars. Hogs, Leading futures ranged as follows: est. Wheat-April May Sept Corn-April Oats-May Pork-May July 8.371/4 Lard-May 4.171/4 July 4.62½ 4.67½ 4.60 4.67½
